

## LOCKDOWN VEHICLES

The sally port tunnel contains many vehicles, from support to defense. Here are the vehicles that are always on hand or available for whatever reason. Special vehicles specific to the prison include:

### CARNIVAL

The Carnival is the only air freighter of its kind, retro-fitted to handle super-convict transport. She has six power plants (four for the engines and two for the containment units), rear ramp access and VTOL capabilities. She also holds ten containment units for prisoners as well as seating for five guards behind secured bulkheads. All interior components are double-protected against electronic countermeasures and control (Disable Device DC 30 to bypass systems without damaging them).

### FORKLIFT

Lockdown's forklifts also carry portable generators to help unload and power active containment pods during transit from the Carnival to prisoner processing.

### HIGH MOBILITY MULTIPURPOSE WHEELED VEHICLE (HUMMER OR HUMVEE)

Lockdown uses two humvee variants for security purposes. The first are armed with heavy caliber machine guns (+7 damage, Autofire) and reinforced. Four such vehicles patrol the perimeter fences or investigate security alarms. The second variant is a two-seater with a flatbed carrying a dedicated power-negating egg-pod and a dedicated generator. There are two in the tunnel, which security uses if a super-powered convict escapes and is recaptured.

### KIOWA WARRIOR

The Kiowa Warrior helicopter bears the advantage of being a rapid-deployment vehicle, taking to the air quickly following minimal preparation. The Kiowa Warrior is meant to handle enemy flyers outside the facility, but it's also useful against ground targets. The Warrior is armed with a heavy machine gun (+7 damage, Autofire).
